The Company has categorized its assets and liabilities into the three-level fair value hierarchy based upon the priority of the inputs to the respective valuation technique. The following summarizes the type of assets and liabilities included within the three-level fair value hierarchy presented in the table above.

Level 1 This category includes exchange-traded bonds and common stock. All common stocks are carried at fair value. The estimated fair value of the equity securities within this category are based on quoted prices in active markets and traded on an exchange thus classified as Level 1.

Level 2 This category includes real estate property occupied by the Company. Properties are generally stated at cost plus improvements less depreciation and encumbrances. However, properties with a fair value less than adjusted book value are shown on the Asset page and Schedule A at fair value. The difference between the fair value and the adjusted book value is nonadmitted. Fair values on real estate property are obtained from appraisals dated within 5 years of the reporting date.

Level 3 The Company has no level 3 assets or liabilities.

NOTES TO FINANCIAL STATEMENTS

- (4) Description of Valuation Techniques and Inputs Used in Fair Value Measurement
The Company has no assets or liabilities measured at fair value in the level 3 category.
Real estate carried at fair value categorized as Level 2 is valued based on appraisals. These appraisals are determined to be Level 2 valuations because the appraisals are partially based on fair values of similar pieces of real estate.
